Factsheet 03: Inside the EUDI Wallet Ecosystem

Trusted identities, portable credentials, user consent— at European scale

The Problem

People and organisations need a secure, interoperable way to prove identity and share official credentials across borders—without oversharing personal data.

PRIVIDEMA's Contribution

PRIVIDEMA enhances this architecture with PETs, performance benchmarks, and security requirements. We test practical scenarios such as remote onboarding and biometric verification to demonstrate privacy and usability together.

The Solution

The EUDI Wallet connects citizens, wallet providers, identity/attestation providers, relying parties, and trust services into a cryptographically verified network. Users choose what to share; interactions are consent-based and end-to-end protected.

European Impact

A dependable, privacy-preserving identity layer that citizens and organisations can rely on—supporting cross-border services, eIDAS 2.0 implementation, and innovation in the Single Market.

Consortium
7 Partners
5 Countries

Budget
€ 5.3 Million
€ 3.1 EU-funded

Duration
36 Months
11/2024 - 10/2027

Funded by the European Union under Horizon Europe and supported by the European Cybersecurity Competence Centre (ECCC).
